PROFILE

Computer Engineering graduate with experience in web, desktop and data-driven software development through cooperative education, contract work and freelance projects. Contributed to ASP.NET MVC management systems, multilingual kiosk applications, API integrations and full-stack monitoring solutions.

Graduated with First-Class Honours (GPAX 3.80) under a full scholarship programme. Particularly interested in full-stack development, IoT technologies and data systems, with experience building machine learning-based monitoring and anomaly detection applications.

EDUCATION

Bachelor of Engineering (Computer Engineering)

Mar 2021 – Jun 2025

Rangsit University

Graduated with First-Class Honours, achieving a GPAX of 3.80/4.00 under the university's full scholarship programme.

KEY SKILLS

- **Frontend Development** (React, Next.js, TypeScript)
- **Backend Development** (Node.js, Express.js, ASP.NET MVC)
- **REST API Design & Integration**
- **Database Design & Data Management** (SQL Server, SQLite)
- **Machine Learning & Data Analysis**
- **Data Processing & Visualization**
- **Desktop Application Development** (WinForms, WPF, Electron)
- **IoT & Monitoring Systems**
- **Software Architecture & Problem Solving**

PROFESSIONAL EXPERIENCE

Freelance Software Developer

Mar 2026 – Present

DigiShark Solution Co., Ltd.

Develop software solutions for events and promotional campaigns, including both web-based and desktop applications.

- Developed web and desktop applications for customer engagement and promotional activities.
- Designed and implemented frontend and backend functionality.
- Managed deployment, data collection and reporting features.

ACHIEVEMENTS

- *Built and deployed a lucky draw web application featuring participant tracking, winner management and automated email confirmation.*
- *Developed production software used in live customer-facing promotional events, including an Electron-based event kiosk with camera integration and usage analytics.*

Frontend Developer Intern / Contract

Aug 2024 – Feb 2025

Bluewind Solution Co., Ltd.

Joined the development team during a cooperative education placement and later continued as a contract developer, contributing to internal management systems and customer-facing applications.

- Developed and maintained ASP.NET MVC modules integrated with REST APIs.
- Implemented CRUD functionality, search filters and data management features.
- Developed multilingual WPF kiosk interfaces using XAML and C#.

ACHIEVEMENTS

- *Delivered equipment, visitor and member management modules for a museum operations platform.*
- *Contributed to a multilingual self-service kiosk project supporting English, Chinese, Japanese and Vietnamese, leading to a contract extension following internship completion.*

PERSONAL PROJECTS

IoT Anomaly Detection Dashboard

2026

Tech Stack: Next.js, Express.js, TypeScript, Python, scikit-learn

- Developed a full-stack monitoring dashboard for predictive maintenance and anomaly detection.
- Implemented machine learning-based anomaly scoring using RandomForestClassifier and sensor statistics.

Class Registration Application

2025

Tech Stack: C#, WinForms, SQL Server LocalDB

- Designed and developed a desktop-based class registration system with database integration and CRUD functionality.
- Proposed and delivered a WinForms alternative solution when the original PowerApps environment was unavailable.

LINE OA API Middleware

2025

Tech Stack: Node.js, Express.js, LINE Messaging API

- Developed backend middleware for LINE Official Account integration, including webhook handling and custom message workflows.
- Implemented secure environment-based configuration and API integration practices.
