

PORTFOLIO

METAWEE CHAROENTUNGSIRIKUL

Computer Engineering Graduate | Aspiring Full Stack Developer

PROFESSIONAL SUMMARY

Computer Engineering graduate with expertise in the full SDLC, specialized in building maintainable software and CI/CD pipelines. Proficient in developing end-to-end solutions, from responsive React web apps with RESTful APIs to multi-language C# WPF KIOSK systems. A proactive Agile team member dedicated to delivering high-quality features on schedule and sharing technical best practices.

SKILLS & TECHNOLOGIES

Frontend Development

- **Frameworks & Libs:** React.js, Bootstrap 5, jQuery
- **Core Web:** JavaScript (ES6+), HTML5, CSS3 (Custom Themes, Responsive Design)
- **Design Tools:** Figma-to-Code, XAML (WPF UI Customization)

Backend & Desktop Development

- **Languages:** C# .NET, Node.js, Python
- **Frameworks:** ASP.NET MVC, WPF, Express.js (Node.js)
- **Specialized:** Line Messaging API, Content-based Filtering (ML)

Database Management

- **RDBMS:** Microsoft SQL Server, SQL LocalDB
- **Data Access:** OleDb (MS Access), Entity Framework (C#)
- **Concepts:** Database Design, CRUD Operations, API Data Integration

DevOps & Professional Tools

- **CI/CD:** GitHub Actions, Streamlit Cloud
- **Version Control:** Git, GitHub
- **Development:** Visual Studio, VS Code

EDUCATION

Bachelor of Engineering in Computer Engineering (First-Class Honours)

Rangsit University, Class of 2025 | **GPAX: 3.80/4.00**

- **Academic Honors:** Recipient of the **Dr. Arthit Ourairat Full Scholarship** (100% tuition coverage).
- **Senior Project:** *Museum Management & KIOSK System* (Cooperative Education Project).
 - Developed a hybrid ecosystem using **ASP.NET MVC** and **C# WPF** featuring real-time API sync and 5-language localization.

EXPERIENCE

Frontend Developer Intern | Bluewind Solution Co., Ltd.

Aug 2024 – Feb 2025

- Developed a Museum POS system with **ASP.NET MVC**, ensuring data integrity through robust backend validation.
- Optimized data performance using **asynchronous jQuery Ajax** and **Web API** for dynamic retrieval.
- Engineered a 5-language **C# WPF KIOSK** application with custom UI components and automated modules (PDPA, T&C, Tax Reporting).

PROJECTS

| WEB DEVELOPMENT

Playtorium Test (Discount Engine) — [View GitHub](#) | [Live Demo](#)

- **Tech Stack:** React.js, Bootstrap 5, State Management, GitHub Actions (CI/CD)
- Engineered an advanced shopping cart discount engine with complex business logic and established an automated CI/CD pipeline for seamless deployment.

Project-SS (Community Portal) — [View GitHub](#) | [Live Demo](#)

- **Tech Stack:** JavaScript, JSON (Data-driven), CSS3 (Custom Neon Theme)
- Developed a responsive data-driven portal featuring a futuristic "Teal Neon" design and modular architecture.

| DESKTOP & BACKEND

Class Registration App — [View GitHub](#)

- **Tech Stack:** C# WinForms, SQL LocalDB
- Built a robust student registration system focusing on adaptive software architecture and efficient database integration.

| DATA SCIENCE & AI

Movie Recommender System — [View GitHub](#) | [Live Demo](#)

- **Tech Stack:** Python, Pandas, Scikit-Learn, Streamlit Cloud (CD)
- Architected a content-based filtering engine using machine learning concepts and managed delivery through a Continuous Deployment workflow.
